

H. FCR OUTPUT TRANSACTION LAYOUTS

This appendix includes an explanation of the output records created by the FCR System and detailed descriptions for each record. Each record layout in this section includes the following information:

1. Field Names;
2. Field Locations;
3. Field Lengths;
4. Field Types (alphabetic, numeric or alphanumeric); and
5. Field Comments.

The Comments section of the record layouts provides an explanation of the contents of the field and its relationship to other fields or records. Additional information regarding each field may be found in Appendix E, “Data Dictionary”. Figures H-1 through H-4, which follow, provide a pictorial representation of how the output records are related.

The record formats for the FPLS external Locate source and 1099 responses are included in this Appendix. If the Locate Requests for the FPLS external Locate sources are submitted via the FCR, the responses will be returned by the FCR. The format for the FCR Locate Response record is consistent, with minor exceptions, to the record format that the FPLS returns effective October 1, 1998. The major differences between the records created by the FPLS or OCSE Project 1099 system and the records returned by the FCR are:

- **Record length** – The FCR will make the external Locate Response Records consistent with the record size of the other FCR output transactions. Since the external Locate Response Records are smaller than the standard FCR output transaction, the additional space in the Response Records will be defined as filler at the end of the record.
- **Record identifier** – The FCR will add a record identifier to the first two positions of the record to be consistent with the FCR Output Transactions and to allow for easy identification of the record type being returned.

The FCR returns all output records to the submitter using the SSA network and the CONNECT:Direct protocol. Additional information regarding CONNECT:Direct may be found in Section 4.1, “FCR Transaction Structures”.

CHART H-1: OUTPUT RECORD LAYOUTS CREATED BY THE FCR	
Output Record Name	Record Purpose
FCR Routine Batch Response Header Record	<p>This record is the first record of the batch of FCR Acknowledgement/Error Records that are returned for a batch of transactions received from a state or territory. Each input record sent to the FCR will receive at least one Acknowledgement/Error Record. If the record submitted is pending SSN verification, the detailed Acknowledgement/Error Record will indicate that processing is pending. (Refer to Appendix G, “FCR Input Transaction Layouts,” for the Input Record Layouts.)</p> <p>This Header Record, along with the associated detail records, will be returned for each batch that is submitted by the state or territory.</p> <p>This record includes the submitter’s batch number.</p> <p>This record contains a Record Identifier of ‘FB’.</p>
FCR Pending Resolution Batch Response Header Record	<p>This record is the first record of a batch of Acknowledgement/Error detailed records for various batches submitted by a state or territory. The records returned in this batch were pending SSN resolution and either have been accepted with identified/corrected SSNs or rejected because a valid SSN could not be found.</p> <p>This record contains a Record Identifier of ‘FE’.</p>
FCR Case Acknowledgement/Error Record	<p>This record is returned to the state or territory at least once for each Input Case Record received by the FCR. The record includes all of the information received from the submitter with an acknowledgement and applicable warning codes and/or rejection error codes. The acknowledgement codes indicate that the record was accepted, with or without minor errors, or is pending acceptance. The error codes indicate the specific errors detected in the input transaction and the reason the transaction is being rejected. Up to five warning and/or rejection error codes can be returned with each record. If the input record was accepted or rejected in the initial FCR cycle, the record will be returned only once in the FCR Routine Batch Response. If the input record must be held awaiting SSN verification of the related person records, this record is returned once with the FCR Routine Batch Response and again when the SSN verification routines are complete for an FCR Pending Resolution Batch.</p> <p>This record provides the submitter with the information necessary to synchronize the FCR data with the information on the state’s or territory’s system.</p> <p>This record contains the Record Identifier of ‘FD’.</p>

CHART H-1: OUTPUT RECORD LAYOUTS CREATED BY THE FCR	
Output Record Name	Record Purpose
FCR Person/Locate Request Acknowledgement/Error Record	<p>This record is returned to the state or territory at least once for each FCR Input Person/Locate Request Record received by the FCR. The record includes all of the information received from the submitter with an acknowledgement and applicable warning codes and/or rejection error codes. The acknowledgement codes indicate that the record was accepted, with or without minor errors, or is pending acceptance. The error codes indicate the specific errors detected in the input transaction and the reason the transaction is being rejected. Up to five warning and/or rejection error codes can be returned with each record. If the input record was accepted or rejected in its initial FCR cycle, the record is returned only once in the FCR Routine Batch Response. If the input record must be held awaiting the verification or identification of the person's SSN, this record is returned once with the FCR Routine Batch Response and again when the SSN verification process is complete for an FCR Pending Resolution Batch. Records that are accepted without a verified SSN, i.e., the SSN submitted could not be verified and a corrected SSN could not be identified, are stored on the FCR as SSN unverified person records. While these records can be changed by the submitting state, SSN unverified person records are not subject to Proactive Matching, FCR Query or Locate processing.</p> <p>This record provides the submitter with the information necessary to synchronize the FCR data with the information on the state's or territory's system. This record includes corrected SSNs, multiple valid SSNs and identified SSNs stored on the FCR for the person.</p> <p>This record will contain the Record Identifier of 'FS'.</p>
FCR Query Acknowledgement/Error Record	<p>This record is returned once to the state or territory for each FCR Input Query Record received. The record includes all of the information received from the submitter with an acknowledgement and applicable warning codes and/or rejection error codes. The acknowledgement code indicates that the record was accepted with or without minor errors. The error codes indicate the specific errors detected in the input transaction and the reason the transaction is being rejected. Up to five warning and/or rejection error codes can be returned with each record. The record will be returned with the FCR Routine Batch Response.</p> <p>This record will contain the Record Identifier of 'FG'.</p>

CHART H-1: OUTPUT RECORD LAYOUTS CREATED BY THE FCR	
Output Record Name	Record Purpose
FCR Response Trailer Record	<p>This record is sent to the state or territory at the end of each batch of transactions created by the FCR. This record will allow the submitter to recognize that the transmission of a batch of data is complete.</p> <p>This record provides the submitter with the record counts necessary to balance the records sent to the records received. When this record is received with a Routine Batch Response Header, it will allow the submitter to balance the submitted transactions against the transactions that were processed by the FCR.</p> <p>This record contains the Record Identifier of 'FX'.</p>
FCR Locate Response Batch Header Record	<p>This record is sent to the state or territory at the beginning of each Locate Response Batch. A Locate Response batch can include the response to FCR queries and Proactive Matches, NDNH responses to Locate Requests and Proactive Matches, and FPLS responses from external Locate sources.</p> <p>This record contains the Record Identifier of 'FL'.</p>
FCR Query/Proactive Match Response Record	<p>This record is sent to the state or territory in response to an FCR Input Query Record. It is also sent to a state or territory automatically when a person is registered by multiple states or territories that include the state or territory, and another state or territory is adding or changing information about the person on the FCR.</p> <p>This record provides the submitter with information regarding the cases and associated participants on those cases for the person.</p> <p>This record contains the Record Identifier of 'FT'.</p>
FCR IRS-1099 Locate Response Record	<p>This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates IRS-1099 as a Locate source to be searched and the submitter has a 1099 agreement with OCSE and IRS-1099 is allowed for the Locate Request Type.</p> <p>This record provides the submitter with the type, status, location and amount of assets or debts owed by or to the individual who is the subject of the Locate Request as returned from the IRS.</p> <p>This record contains the Record Identifier of 'FH'.</p>

Output Record Name	Record Purpose
FCR SVES Title II Locate Response Record	This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates SVES as a Locate source to be searched. This record provides the submitter with SVES Title II data. This record contains the Record Identifier of 'FK'.
FCR SVES Title XVI Locate Response Record	This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates SVES as a Locate source to be searched. This record provides the submitter with SVES Title XVI data. This record contains the Record Identifier of 'FK'.
FCR SVES Prisoner Response Record	This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates SVES as a Locate source to be searched. This record provides the submitter with SVES Prisoner data. This record contains the Record Identifier of 'FK'.
FCR SVES Not Found Response Record	This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates SVES as a Locate source to be searched. This record provides the submitter with SVES Not Found. This record contains the Record Identifier of 'FK'.
FCR Locate Response Record	This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates 'ALL' or one of the following as the Locate source to be searched: Social Security Administration, Department of Defense, Federal Bureau of Investigation, IRS (non-1099) or the Department of Veteran Affairs. This record will be returned once for each Locate source requested. The format and information available for return differs for each source and the Locate Request Type. This record contains the Record Identifier of 'FF'.

CHART H-1: OUTPUT RECORD LAYOUTS CREATED BY THE FCR	
Output Record Name	Record Purpose
FCR NDNH Locate/Proactive Match Response Record	<p>This record is sent to the state or territory in response to an FCR Input Person/Locate Request Record when the submitter designates ‘ALL’ or the National Directory of New Hires as the Locate source to be searched. It is also automatically sent to the state or territory when a person is added to the FCR or the NDNH receives a new record that matches a person on the FCR.</p> <p>This record will be returned once for each UI record found. This record may be returned up to twice for each QW record found: one that will contain the Employer Address and another that will contain the Employee Address. This record may be returned up to three times for each W-4 record found: two that will contain the Employer Address and another that will contain the Employee Address.</p> <p>The format and information available for return differs for QW, UI and W-4. The Locate Request Type determines the type of information returned from the NDNH. The number of quarters returned for QW and UI and the number of W-4 records returned are based on whether this record is in response to a Locate Request or in response to a Proactive Match. This record contains the Record Identifier of ‘FN’.</p>
FCR MSFIDM Response Record	<p>This record is sent to the state or territory in response to a data match with a Multistate Financial Institution (MSFI). The match with the MSFI is automatically initiated for the state or territory using eligible cases on the Federal Offset File. An open case on the Federal Offset File is considered eligible if the SSN and Name combination is verified and the Offset Exclusion Indicator Type does not equal ‘FIN’ (exclude Financial Institution matches).</p> <p>This record will be returned for each MSFI account record that matches, using the SSN, to eligible records on the Federal Offset File.</p> <p>This record contains the Record Identifier of ‘MC’.</p>
FCR Reconciliation/Data Inconsistency File Header Record	<p>This record is the first record of a batch of FCR Case and Person Reconciliation Records or FCR Data Inconsistency Records sent to a state in response to an approved request for a State Reconciliation File or FCR Data Inconsistency File.</p> <p>This file contains the FIPS code of the state or territory that requested the file and the date the file was created.</p> <p>This record contains the Record Identifier of ‘RB’.</p>

CHART H-1: OUTPUT RECORD LAYOUTS CREATED BY THE FCR	
Output Record Name	Record Purpose
FCR Data Inconsistency File Record	<p>This record contains a Record Identifier of 'RC'.</p> <p>This record is returned to a state or territory that requested the FCR Data Inconsistency File. The file contains case and person specific information that fails specific data inconsistency edits for the state that registered the active participant on a IV-D case with a verified SSN and no FV Indicator.</p>
FCR Case Reconciliation Record	<p>This record is returned to the state or territory that submitted an approved request for a Reconciliation File for each case registered by that state on the FCR at the time the Reconciliation File request was processed.</p> <p>The file contains case-specific information on each case registered by that state on the FCR at the time the Reconciliation File request was processed.</p> <p>This record contains the Record Identifier of 'RD'.</p>
FCR Person Reconciliation Record	<p>This record is returned to the state or territory that submitted an approved request for a Reconciliation File for each person registered by that state on the FCR at the time the Reconciliation File request was processed.</p> <p>The file contains person-specific information on each person registered by that state on the FCR at the time the Reconciliation File request was processed.</p> <p>This record contains the Record Identifier of 'RS'.</p>
FCR Reconciliation/Data Inconsistency File Trailer Record	<p>This record is the last record of a batch of FCR Case and Person Reconciliation Records or FCR Data Inconsistency Records sent to a state in response to an approved request for a State Reconciliation File or FCR Data Inconsistency File. This record will allow the requester to recognize that the transmission of a Reconciliation File/Data Inconsistency File is complete. This file contains the number of case and person records returned and the number of Response Records returned.</p> <p>This record contains the Record Identifier of 'RX'.</p>

Field Name	Location	Length	A/N	Comments
Record Identifier	1-2	2	A/N	This field will contain the characters 'FB'.
Transmitter State/ Territory Code	3-4	2	A/N	This field will contain the two-digit numeric FIPS Code of the state or territory that transmitted the batch to the FCR.
Version Control Number	5-9	5	A/N	This field will contain the numbers '01.00'. OCSE will notify submitters when this field changes.
Date Stamp	10-17	8	N	This field will contain the date of transmission of the response to the batch submitter. This field will be in CCYYMMDD format.
Batch Number	18-23	6	A/N	This field will contain the sequential batch number sent by the transmitting state/territory. The FCR sends this record, and the associated Acknowledgement/Error Records, once per submitted batch number.
Batch Error Code 1	24-27	4	A/N	If a transmission error is identified for the submitted batch, this field will contain a four-position error code to identify the first error detected.
Batch Error Code 2	28-31	4	A/N	If multiple transmission errors are identified for the submitted batch, this field will contain a four-position error code to identify the second error detected.
Batch Error Code 3	32-35	4	A/N	If multiple transmission errors are identified for the submitted batch, this field will contain a four-position error code to identify the third error detected.
Batch Error Code 4	36-39	4	A/N	If multiple transmission errors are identified for the submitted batch, this field will contain a four-position error code to identify the fourth error detected.
Batch Error Code 5	40-43	4	A/N	If multiple transmission errors are identified for the submitted batch, this field will contain a four-position error code to identify the fifth error detected.
Filler	44-920	877	A/N	This field will be used for future versions. For the current version, it will be all spaces.

SSN Validity Code	641	1	A/N	<p>This field will contain one of the following codes to indicate the validity of the SSN submitted:</p> <p>C – The SSN submitted for this person was corrected</p> <p>E – The SSN and Name combination submitted for this person could not be verified or corrected but the additional person data provided identified an SSN for this person</p> <p>P – The SSN was not submitted, but the additional person data submitted identified an SSN for this person without manual intervention and is provided; or the SSN provided did not verify but an SSN was identified using SSA’s alpha search</p> <p>R – The person data submitted identified multiple possible SSNs for the person and the provided SSN was selected via the Requires Manual Review process</p> <p>S – The IRS-U SSN submitted allowed the SSN to be identified using the IRS information</p> <p>V – The SSN and Name combination submitted was verified by the SSA SSN verification routines</p> <p>Space – The SSN provided could not be verified or there was no SSN provided and one could not be identified using the information submitted. See the fields Error Code 1 through Error Code 5 for a more specific explanation of the condition.</p> <p>If the Acknowledgement Code equals ‘AAAAA’ and this field equals a space, the person has been accepted by the FCR as an unverified person and is not available for FCR Query or Proactive Matching. If a state identifies a new SSN, an IRS-U SSN, Additional Name information, or ESKARI information that can be used to verify the SSN, the state may submit the new information as a Change Transaction. The state may also elect to delete the person and add them back to the FCR with the new information.</p> <p>If the Acknowledgement Code equals ‘REJECT’, the person has been rejected by the FCR and this field will be a space. If the state finds a new SSN for the rejected person, the person must be resent as an Add Transaction.</p>
Provided/Corrected SSN	642-650	9	A/N	<p>If present, this field will be the identified or corrected SSN for the person found during the SSN verification routines. This field will contain a valid SSN when the SSN Validity Code equals ‘C’, ‘E’, ‘P’, ‘R’ or ‘S’. Otherwise, it will be spaces. The Provided/Corrected SSN will be used to store the person record on the FCR.</p>

Multiple SSN 1	651-659	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, the first additional SSN will be in this field.
Multiple SSN 2	660-668	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, the second additional SSN will be in this field.
Multiple SSN 3	669-677	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, the third additional SSN will be in this field.
SSA Date of Birth Indicator	678	1	A/N	If the Date of Birth on the input record is within one year (plus or minus) of the Date of Birth stored on the FCR, this field will contain an 'N'. If the Date of Birth returned in this record is not within one year (plus or minus) of the Date of Birth stored on the FCR, or if it was not sent by the state but is identified by SSA, this field will contain a 'Y'. If Warning Code PW010 is returned, this field will contain a 'Y'.
Batch Number	679-684	6	A/N	This field will contain the submitter-assigned number of the batch that contained the input record.
Date of Death	685-692	8	A/N	If applicable, this field will contain the SSA-recorded Date of Death in CCYYMMDD format, for the person. If not, this field will contain spaces. Note: The FCR returns '01' in the day portion of the Date of Death when the SSA Death Master File contained '00' in the day.
SSA Zip Code of Last Residence	693-697	5	A/N	If applicable, this field will contain the valid Zip Code of the person's last residence based on SSA's death records. Invalid or incomplete Zip Codes on the SSA death record will not be returned. If a Zip Code is not available or the Zip Code provided by the Death Master File was not validated by Finalist, this field will contain spaces.
SSA Zip Code of Lump Sum Payment	698-702	5	A/N	If applicable, this field will contain the valid Zip Code of where the lump sum death benefit payment was sent based on SSA's death records. Invalid or incomplete Zip Codes on the SSA death record will not be returned. If a Zip Code is not available or the Zip Code provided by the Death Master File was not validated by Finalist, this field will contain spaces.
FCR Primary SSN	703-711	9	A/N	This field will contain the SSN stored on the FCR as the person's primary SSN.

CHART H-5: FCR PERSON/LOCATE REQUEST ACKNOWLEDGEMENT/ERROR RECORD				
Field Name	Location	Length	A/N	Comments
FCR Primary First Name	712-727	16	A/N	This field will contain the first name of the person stored on the FCR that verified with the Primary SSN.
FCR Primary Middle Name	728-743	16	A/N	This will be the middle name of the person stored on the FCR that verified with the Primary SSN.
FCR Primary Last Name	744-773	30	A/N	This will be the last name of the person stored on the FCR that verified with the Primary SSN.
Acknowledge-ment Code	774-778	5	A/N	This field will contain a code to indicate if the record was accepted, rejected or is pending. If the record was accepted, the code 'AAAAA' will appear in this field. If the record is pending SSN identification on the person record, the code 'HOLDS' will appear in this field. If the record was rejected, the code 'REJECT' will appear in this field. Refer to Appendix J, "Error Messages," for a complete explanation of these codes.
Error Code 1	779-783	5	A/N	If the record was accepted, but a non-critical error was detected, an alphanumeric warning code beginning with 'TW', 'LW' or 'PW' will appear in this field. If the record was rejected, an alphanumeric error code beginning with 'LE', 'PE' or 'TE' will appear in this field. Refer to Appendix J, "Error Messages," for a complete explanation of these codes.
Error Code 2	784-788	5	A/N	If the record was accepted, but a second non-critical error was detected, an alphanumeric warning code beginning with 'TW', 'LW' or 'PW' will appear in this field. If the record was rejected for multiple errors, an alphanumeric error code beginning with 'LE', 'PE' or 'TE' will appear in this field. Refer to Appendix J, "Error Messages," for a complete explanation of these codes.
Error Code 3	789-793	5	A/N	If the record was accepted, but a third non-critical error was detected, an alphanumeric warning code beginning with 'TW', 'LW' or 'PW' will appear in this field. If the record was rejected for multiple errors, an alphanumeric error code beginning with 'LE', 'PE' or 'TE' will appear in this field. Refer to Appendix J, "Error Messages," for a complete explanation of these codes.

CHART H-7: FCR RESPONSE TRAILER RECORD				
Field Name	Location	Length	A/N	Comments
Record Identifier	1-2	2	A/N	This field will contain the characters 'FX'.
Case Records Received	3-10	8	N	If the batch being returned is a routine batch, this field will contain the number of FCR Case Input Records (with Record Identifiers of 'FC') received in the batch. If none of these records are returned in the batch, this field will be zeros.
Case Records Accepted	11-18	8	N	If the batch being returned is a routine batch or a pending resolution batch, this field will contain the number of accepted FCR Case Input Records (with Record Identifiers of 'FC') from the batch. If none of these records are returned in the batch, this field will be zeros.
Case Records Rejected	19-26	8	N	If the batch being returned is a routine batch or a pending resolution batch, this field will contain the number of FCR Case Input Records (with Record Identifiers of 'FC') from the batch that were rejected by the FCR. If none of these records are returned in the batch, this field will be zeros.
Case Records Pending	27-34	8	N	If the batch being returned is a routine batch, this field will contain the number of FCR Case Input Records (with Record Identifiers of 'FC') from the batch that are pending as of the transmission of the response. Case Input Records to add a new case may be pending if the SSN identification for the related person(s) record is not complete. If none of these records are returned in the batch, this field will be zeros.
Person/Locate Records Received	35-42	8	N	If the batch being returned is a routine batch, this field will contain the number of FCR Person/Locate Request Records (with Record Identifiers of 'FP') received in the batch. If none of these records are returned in the batch, this field will be zeros.
Person/Locate Records Accepted	43-50	8	N	If a batch being returned is a routine batch or a pending resolution batch, this field will contain the number of FCR Person/Locate Request Records (with Record Identifiers of 'FP') from the batch that were accepted. If none of these records are returned in the batch, this field will be zeros.
Person/Locate Records Rejected	51-58	8	N	If the batch being returned is a routine batch or a pending resolution batch, this field will contain the number of FCR Person/Locate Request Records (with the Record Identifier of 'FP') from the batch that were rejected. If none of these records are returned in the batch, this field will be zeros.
